---

## SUMMARY

Detail-oriented professional with hands-on experience supporting web applications, diagnosing user-reported issues, validating expected behavior, and collaborating closely with development teams to communicate bugs and feature requirements. Built a strong technical foundation in Java and JavaScript, with practical experience using GitHub for version control, Postman for API testing, and IntelliJ and VS Code for development and debugging, along with functional testing to ensure application reliability. Seeking an entry-level QA Engineer or Software Developer role where I can contribute to building and testing high-quality software while continuing to learn and grow in a collaborative team environment.

## LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript, HTML, CSS | React, Jest | GitHub, IntelliJ IDEA, VS Code, JSON

## EXPERIENCE

### **MoneyMap** — LaunchCode Capstone Project

- A web application that allows users to track and manage their income and expenses, providing a clear visual summary of their financial activity.
- Developed interactive React components for dashboards, transaction tables, and charts to display financial data dynamically.
- Built JavaScript functions to handle user input, update transaction data, and calculate totals for income, expenses, and balances.
- Implemented automated unit tests with Jest to verify functionality of components and JavaScript functions, ensuring application reliability.
- Full Project Tech Stack: JavaScript, HTML, CSS, React, Jest, GitHub, VS Code

### **Customer Liaison** — Reusely

2019 – 2021

- Managed and resolved 10+ customer website issues per week, identifying problems and ensuring smooth user experiences.
- Escalated bugs and feature requests to the development team, contributing to timely resolution and feature implementation.
- Collaborated closely with developers to clarify requirements and verify that website updates functioned as intended.
- Tested website functionality after updates, validating that fixes and new features worked correctly before confirming with customers.
- Improved workflow by systematically tracking issues and following up, increasing resolution efficiency and customer satisfaction.

**Supply Management Specialist — iTechShark**  
**2014 – 2019**

- Managed procurement and inventory of Apple product parts across multiple stores in Missouri, ensuring consistent availability and operational efficiency.
- Communicated with international suppliers in China to place orders, track shipments, and resolve delivery issues, maintaining timely restocking.
- Prepared and maintained accurate documentation for all orders, shipments, and inventory updates, reducing errors and improving traceability.
- Coordinated with store managers to forecast part needs, optimizing inventory levels and minimizing shortages.
- Streamlined supply processes by implementing consistent tracking methods, improving efficiency and accuracy of inventory management.

**EDUCATION**

**LaunchCode**, Web Development, April 2026

**University of Missouri-St.Louis**, Business Administration, International Business  
May, 2018

**Sakarya University**, Foreign Trade  
May, 2011
